

Timestamp	What did you like best about the online/hybrid unit?	What did you like least about the online/hybrid unit?	If you could change it, what would you change about it?	Do you felt that you learned the material as well as you would if you were in a regular class with the teacher teaching? Why or why not?	Would you ever consider having the entire year's course be like this? (Mostly online with some teacher centered classes) Why or why not?	Overall, what did you think of your experience using this?
4/9/2014 6:29:48	I liked being able to work at my own pace, and having the opportunity to access my assignments on the computer, because I could do it from essentially any location. I also enjoyed the fact that I was able to be independent in each of my assignments.	Sometimes I would forget to bring my flash drive either home, or to school, so that was a bit of an annoyance because I wasn't able to do my work at times. Also, although I enjoyed it online, there were some tradeoffs, such as the chance that a document may get deleted.	I would only change the due dates at times, because if they're at three o'clock I can't always hand it unless I do it earlier or at school, but I rarely faced an issue with that.	I certainly feel that I learned this material as well, if not better, than in a regular class, due to the fact that I was able to really spend my own time on my work and deal with it based on my ability, and I had more time to study a certain area if I wasn't completely comfortable with it.	I would definitely do a course like this (mostly only for Spanish, not all classes), because as I originally said, I have the opportunity to work at my own pace and familiarize material with myself, based on my level of knowledge with it.	I felt that I had a very positive experience with my hybrid Spanish class, because of the freedom it offered for students to work independently, but still feel a connection to fellow classmates (because of forums, etc.).
4/9/2014 7:18:25	I was able to work at my own pace.	Typing everything can get annoying, obviously it's online though so you can't change that.	For the notes to be on a document not in videos.	Yes, because I was still able to retain the knowledge when we were quizzed on it.	No, because you still need some normal parts where you have to write and participate with the rest of the class.	It was interesting. It was very different but enjoyable and easy to use.
4/9/2014 6:36:40	everything was due at the end of the week so I could do things in the order I wanted	I felt like I was doing more work than the regular class I didn't like using word for doing the work because at times it was difficult to work with. In addition, the times were very inconsistent. One day the homework would be due at 10 pm and then another day homework would be due at 3 pm.	less homework	Yes if not better. I felt like I could move at my own pace as opposed to the class's.	Yes I enjoyed the online class.	Yes I liked it
4/9/2014 16:41:04	I enjoyed how i was able to go on youtube and watch the videos. I felt that the videos on youtube really helped me learn what the topic was. I also enjoyed writing in the forum. It helped me write paragraphs in spanish.	I didn't like using word for doing the work because at times it was difficult to work with. In addition, the times were very inconsistent. One day the homework would be due at 10 pm and then another day homework would be due at 3 pm.	I would find a different way to do the homework and i would want a time where you have time to submit it rather than at 3 pm.	Yes because the videos allowed me to learn more information. If you gave us videos for the rest of the year i would believe that i would be learning more.	I wouldn't because there is so much work and kids would be so backed with other work. So i would definitely do it for like 2 months but don't do it the whole year.	It was a great experience for myself and others. I learned a lot from the videos and it was just a great experience for me.
4/10/2014 10:21:54	The best part of it was that I would never forget anything at school. I would always have my work online.	The only thing that took a while to finish were the review packets.	I would give students the physical copy of all the papers so that we can go back to them easily.	Yes because the video were explained as well as it would be in class and we can go back for any problems.	I would want to have certain months or semesters assigned online and assigned in class. It would give students the advantage of doing well in both different ways of learning.	I enjoy how easy it was for me. It made doing spanish homework and studying for spanish less stressful.
4/10/2014 14:24:24	I got to learn at my own speed and not have to wait for others.	I did not like the forum assignments.	I would get rid of it completely.	Yes because we were looking at the same material and I was more focused when I was working at my own pace.	Yes I would like it because it allowed me to perform my best without having to wait for others.	I really liked this experience.

4/10/2014 14:46:10	<p>I had a lot on the bottom, but trust me, i enjoyed it a lot.</p> <p>It allowed me to go at my own pace and go over anything I did infinite times. The forums allowed creativity and responses- just like school.</p>	<p>I did not like typing in the word documents to submit it- I think it is not practical and is uncomfortable. Paper worksheets, like used in the regular class, were much easier to use.</p> <p>Also, we were supposed to separate from the class, but we ended up talking to the class more than we would while they took notes because the class was bored.</p> <p>With that, I also feel we also had a more burdensome workload than what we had before we started the online course. There were more and more complicated homework assignments, such as having to do presentations and fill out forums and website exercises.</p> <p>Also, for the vocabulary, I would have something better than just copying the vocab sheet from Conjuguemos and have something more productive- in the regular class we look in dictionaries.</p>	<p>I would change the word document finalized process and maybe change it to become easier to fill out or do something with paper worksheets. I would reduce the workload to equal that of the class. Also, i would encourage more vocab focus</p>	<p>I became more lax in my studying because i only had to do the conjuguemos and fill in the worksheets from the vocab sheets in conjuguemos. I also got a lower grade on my test- not much, but still a little- it went from a 95-100 to a 91. I learned, but it was uncomfortable doing everything on a computer- a more hands-on approach would be preferable.</p>	<p>No- eventually the typing out worksheets and doing more work would get to me and i would get stressed out. I would rather do it on paper and do the vocab and everything with the hands-on approach used by the regular classroom. The extra help chat was not very effective and people ended up asking the teacher in class and sometimes it didn't work.</p> <p>The culture packets were hard to go over on a computer and i ended up having to print it out- I would run out of paper printing packets and worksheets out!</p>	<p>I think that it was a good idea, but could be executed better. It was a fun few weeks experimenting with the website and watching from an outsider's view how great the regular class is.</p> <p>It was great.</p>
4/23/2014 22:06:35	<p>What I liked best about the online unit was the ability to be independent and complete the assignments at my own pace.</p>	<p>What I liked least about the online unit was I didn't feel like I absorbed the information as well as I would have if it were being taught by a teacher in class.</p>	<p>I would spread the assignments out more if I could change it.</p>	<p>No, because I personally learn better by listening to the lesson being taught and writing down notes. By writing it down I am able to absorb it better and it also gives me a chance to ask questions at the moment I have them.</p>	<p>No, because I wouldn't retain all of the necessary information taught throughout the year.</p>	<p>Overall, I enjoyed working independently and being able to work at my own pace. However, I don't think I retained as much information using the online unit.</p>
